Statement from the Team at 9/11 State of Mind.

With the Covid-19 pandemic effecting all facets of America. Events and Tributes to pay respects and remembrance what happened during 9-11, where being scaled down or canceled across the country. With only a few weeks to go before September 11, 2020, a group of Musicians, Public Personalities and Patriotic Americans decided to throw Virtual Online Event like no one has ever seen before! One that will incorporate an online event with a live ceremony, from New York to Nashville. In hopes to bring people together and unite us once again to pay Tribute to those lost that day, all the days after and honor those still suffering the effects of Ground Zero related illnesses today.

This unique event will consist of Music, Messages and Memories from bands like Saving Abel, Chris Turner, Thomas Gabriel. Just to name a few!

Messages and Memories from Orange County Choppers very own, Paul Sr and Joannie Kay. Joanne Cash {Sister of the late Johnny Cash}, as well many, many more from our Military, First Responders and fellow Patriotic Americans from across the United States.

911-State-of-Mind is a free event but with your help, donations received will go towards building the 9/11 Remembered Traveling Memorial Foundations, 5 Tractor Trailers with a Virtual Reality Museum Experience inside them, to travel the Country and maybe the World someday. For everyone who can't make it to Ground Zero in person can get a chance to experience the way it feels to be at Ground Zero for themselves.

In conjunction with, Together for The Good Inc., A veteran certified organization that supports the mental health, suicide prevention and the needs of our Troops, First Responder Community and their Families across the United States. Together their mission is to remind everyone that 9/11 didn't end in 2001 and as Americans we need to come together in a 911-state-of-mind and begin the healing by uniting Americans once again, like we did after that fateful, tragic day. Let's get working together again!
